

Project and Program Management

Competitive organizations of all sizes continually change and improve. Essential to achieving results on initiatives is ensuring you have the capability and resources for success. Significant investments in time, resources, effort and cost too often fail to meet objectives due to ineffective execution planning and management. Initiatives can fail to meet achieve strategic objectives for many reasons, from ineffective commitment, vision and planning, to ill-managed scope, deadlines, dependencies, changes and issues, to communications, resources, economics, and other contributors. Defining the project or program operating model and implementing best practices and processes are essential for organizations seeking high confidence in achieving their program objectives.

Services

Through program definition and scoping, structuring, leadership and execution, Markets Technology & Compliance (“MTC”) helps companies run their programs efficiently and effectively to achieve the results they expect. We combine expertise in evaluating program portfolios, running large-scale initiatives, executing annual programs, establishing PMOs, and project management on hundreds of efforts to structure a program combining best practices while addressing characteristics unique to the environment. Our broad range of Program Management consulting services include:

- Program Scoping and Execution Roadmap development
- Program Management Office (“PMO”) definition and structuring
- Program Operating Model definition and Program Execution Management
- Project Portfolio prioritization and management
- Project Management of individual and coordinated projects under a consolidated program
- Project definition, business case and justification assistance, estimation, and planning
- Program execution tools selection and implementation
- Struggling projects assessment and corrective action implementation
